

New Green Office Areas on Campus

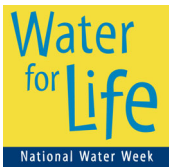

- Economics and Business Library
- Student Support Services (Gatton)

Green Office List on Website

A list of Green Office Representatives has been published to allow staff to identify Green Office areas on campus as well as contact details of associated Green Office representatives for each area. The list is now available from the Environmental Management System website at:

www.pf.uq.edu.au/Ems/GrnOffPrgrm.html.

National Water Week (15-21 October)

As part of NWW 2006 Unigreen Volunteers and Green Office Representatives distributed promotional material to University schools and centres to increase awareness of water conservation.

Don't be a Drip and Water Management posters were displayed in strategic places such as tea rooms and notice boards in all campus precincts.

A workshop was held during NWW to identify areas where water is being used and where water savings may potentially be made. Suggestions from the day are now being considered and implemented.

Stuart Green (Environmental Engineer from Property and Facilities Division) delivering a water workshop to participants during NWW.

Green Office Initiatives around Campus

One Green Office re-uses all of their single sided paper back through their printer. The bottom tray is recycled/pre-used paper which has enabled them to use a minimal amount of new paper in the office. To further reduce paper consumption, the office always prints final copies double sided.

Email us with the initiatives that you have found works in your area.

UQ Libraries Switch to Recycled Paper

UQ libraries have made the decision to trial 100% recycled content paper in photocopiers and printers throughout the 13 branches until the end of 2006. If all goes smoothly, the libraries will adopt the use of recycle paper on a continuing basis!

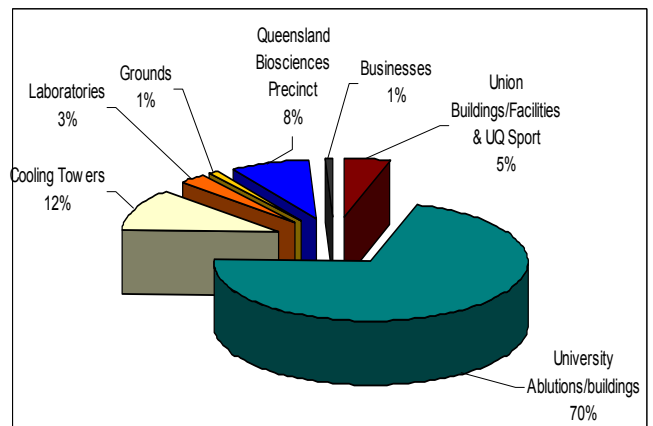

Buying Environmentally Friendly Products

A reminder that you can buy a range of high quality and competitively priced recycled content paper from the P&F Central Store. View the catalogue at <http://www.pf.uq.edu.au/StoresCatalog.html>

Did You Know?

Results of a water usage audit in 2005 revealed UQ's key water usage areas to be university ablutions and air conditioning and cooling towers. P&F is retrofitting all toilets, urinals, shower and hand basins with water efficient devices.

Breakdown of Water Usage – St Lucia Campus 2005.

Coming events - mark these in your diary!

Next Green Office Update Session

The next Green Office Update Session will be held early 2007
