

18 September 2017

NOTIFICATION - Changes to UQ Parking Permit System

A new system is being implemented to provide significant improvements for UQ staff who park at the University's campuses or utilise permits for visitors and guests. The new system will eliminate the need to have paper permits.

Features of the online vPermit management system include:

- Apply for and pay for your parking permit online (UQ staff and non-UQ staff) or salary sacrifice your permit (ongoing and fixed-term UQ staff)
- Manage your registration details online
- Add up to five registrations (only one can be active at any time)
- Change your active registration online before you start work or when you get to work
- Update your details
- Cancel your permit

From the 18th until the 29th September 2017, we will be migrating our current permit management system to the new vPermit management system and completing our system checks.

Permits will not be able to be created, cancelled or changed during this period.

Staff wishing to obtain a permit during this period will be required to park in one of the casual permit areas.

On the 3rd October our new vPermit management system will be available for use.

More information available [here](#).
