Building 69 – Telecommunications Tower

The cost is fully met by telecommunications company. Installation such as these are common across all UQ campuses. UQ has limited discretion to deny such installations which are covered by specific legislation. UQ ensures mountings are as discrete as possible and do not detract from the building/structure appearance. All such installations are rigorously assessed for safety of staff and students both within buildings and passers-by. All such installations are covered by an appropriate lease.
